

JET-Freak

Boost Glider

The Jet Freak is a simple front-engine boost glider for sport flying and small fields. It uses the old style of fixed pods with ejecting engine casings (you can wrap a small streamer around the motor to make it NAR legal for contests). The Jet Freak is notable by the way it boosts straight up into the air.

For a little fun with boost gliders, you ought to give this model a try. Seal the balsa surfaces, and give it a light coat of paint for visibility.

PARTS LIST

- 1 BNC-20A
- 1 BT-20 cut to 3 inches
- 1 launch lug
- 1/16" balsa
- 1/8" balsa

Recommended engines: 1/2A6-2, A8-3, B4-4

Pylon
(make 1)
1/8" balsa
