NICK SAYS ALL SYSTEMS ARE "GO!"

SANTA CLAUS NO MYTH! EXCLUSIVE INTERVIEW WITH THAT GRAND OLD MAN AT THE TOP OF THE WORLD!

DATELINE-NORTHPOLE...
Our roving Rocket Times reporter brings you this exclusive interview with Santa Claus himself! Now, some people claim they don't believe in O'Saint Nick... but lots of us here at Centuri do! Every year about this time someone named "S.C." sends in a mail order for an unbelievable huge assortment of rocket supplies to be sent to "Packing Dept, North Pole". We work so hard getting all those goodies shipped off, that we begin to feel like elves.

Our reporter found Santa busy in his workshop, tooling up for Christmas. Elves were running around all over the place, bumping into each other about like the characters on "Gilligan's Island". Santa took time to answer our questions:

"Santa... uh, what should I call you, Santa Claus, St. Nicho-las, or what? You've been known by so many names by people in so many different lands, over the centuries."

Santa chuckled. "Don't be so formal, son. My friends just call me Nick, and everybody is my friend!"

"Oh, Nick. Can you tell our readers something about your job, which they may not know? Like, do you have any unusual problems?"

Santa thought a moment, and said "Well, yes, every year I have the same problem about how to get that sleigh of mine running well! After all, I've been using it for nearly two thousand years and it's got a lot of miles on it! But its pretty sturdy. Legend has it that my sleigh was made by an ancestor of the folks who made Studebakers, so you know its got to be good!"

"Nick, have you ever thought of replacing the sleigh with a newer model?"

"No, son, I'm kind of fond of it. But a few months ago some guy named Kavel Neveel, or Walt Disney or something, tried to talk me into a rocket powered version. He said I should get "with it" and have a crash bar, ejection seat and Day Glo colors... Then some rocket company down in Arizona made a prototype of it... my it was a green and red vision of power! But I turned them down... I'm too old to change my ways."

"Nick, we hope you never do change! Say, how do you keep up with the growing numbers of kids in the world?"

Santa pointed off to a row of computers busily clicking away, and said "Those gadgets are a great help! We use computers to keep track of which children want which presents. But other than computers, we don't use many of your modern doodads... gotta keep the personal touch, you know. Business is growing though... someday if there is a colony started on the moon I might have to start off earlier on Christmas Eve to get to all the chimneys!"

Santa took me in to have a snack. He said "Say, this reminds me of a little party we had last New Year's Eve. My Claus baked cookies and we had the neighborhood folk come over. We had 16 reindeer (our crew brought 12), 7 elves and a polar bear that was headed for Las Vegas. You know how it is; all we could do was talk shop. The reindeer wanted a new contract with no more roof landings. The Santa mild-touched them, they said. We'll work it out."

"Nick, is there any last thing you want to say to our readers?"

"Yes, tell all your rocketeers friends over there at Centuri, Merry Christmas to all, and to all a good flight!"

THE NEW SCOUT ROCKETS ARE TAKING OFF!

One year ago we developed a whole line of Scout rocket products exclusively for the Boy Scouts of America. The "Centuri Rocket Derby", it is similar to the famous Cuban Scout "Pinewood Derby", but with rocketry excitement! The "AKER-1A" streamer-recovery rocket kit is sold singly and in sets. It includes complete instructions, plans for an easy home-made launcher, and rules for three flight contests. A complete line of Scout rocket products are now available in sets and by mail order.

The folks in our Sales Department asked us to pass this friendly tip along to you. If you order from us and want to receive your package before Christmas, please mail your order in to us no later than December 1.

Lots of you have written in to ask how you can get a subscription to Rocket Times. Well, here's how it works. There are no "subscriptions", as such. Every two or three months we try to find time to issue an issue. We go to the fellow in charge of dollars (he looks like a kind of friendly Snoopy M. Duck) and he checks to see if we have enough coins to pay the postage for mailing out unthousand thousand copies, mostly folks who have mail-ordered within the last year. If we can't do that on a particular issue, then we just enclose a copy, with all orders we ship out. Either way, if you like to receive Rocket Times, you can get it by ordering it at least once in a blue moon. If several months go by, and you haven't received a new issue, just send us a large self-addressed envelope with 2 first class stamps and ask for the current issue.

Keep 'em flying!
"THIS IS MISSION CONTROL" COUNTDOWN TO LIFT-OFF EXCITEMENT!!

EAGLE POWER

WHAT'S AN EAGLE POWER? Why, it's a Screaming Eagle, a Power-Pad and all the goodies needed to start flying model rockets! Requires no paint, modeling tools or special skills. Nothing else to buy, except a battery. Eagle Power is your best buy for price, convenience and performance.

- SCREAMING EAGLE ROCKET KIT WITH PARACHUTE
- POWER-PAD LAUNCH SYSTEM WITH ROD TILTER
- 2 POWERFUL ENGINES, CHUTE WADDING & GLUE

Catalog No. 3501 $9.95

Battery not included

POWER TOWER universal design for all sizes of model rockets and engines.

MODEL ROCKET LAUNCH STAND

TILT ADJUSTMENT
Can also accept heavy-duty 3/16" rod (available separately) for giant rockets.

LAUNCH ROD
Two-piece 1/8" diameter, for all standard model rockets.

COMPACT
 Legs come off for storage and transportation.

Catalog No. 3610 $3.95

POW-CONTROL

GENERAL PURPOSE LAUNCH CONTROLLER

RECOMMENDED BATTERY

Catalog No. EPC-3 $4.95

POW-CONTROL

HEAVY DUTY LAUNCHINGS

We strongly recommend the use of a stronger sidefire 3/16" diameter launch rod, when launching extra large rockets, cluster-engine birds such as the Century Saturn V, Saturn 1B and the 1/45th Little Joe, or any rocket with engine power greater than "D" class.

Inexpensive 3/16" x 36" piano wire may be found in many hobby shops or welding rod of this size is carried by hardware and building supply stores. But you may order a special machined 3-piece rod from us, collapsible for easy storage.

Catalog No. LR-188 $1.25

POW-PAD

MODEL ROCKET LAUNCH SYSTEM

- For all standard rockets, even Minis!
- Handles all types of igniters.
- For "SA" thru "D" and staged engines!
- Compact, reliable, highly portable!

PROBABLY THE WORLD'S MOST SENSIBLE LAUNCHER EVER!

LAUNCH CONTROLLER
With check light, recessed button, chrome "stick-ons". Fits in carrying handle for portability.

Catalog No. 3606 $7.95

POW-PAD

Here is our latest rocket outfit! It’s like the “Eagle Power” but with more of everything. You may already have got your “start” sometime ago... so here’s a great gift idea for friends.

- SCREAMING EAGLE KIT
- EXCALIBUR KIT
- POWER-PAD LAUNCHER & TILTER
- 4 POWERFUL ENGINES
- BIG 40 PAGE GUIDEBOOK
- CHUTE WADDING & GLUE

Catalog No. 3502 $14.95

Battery not included

$7.95

Catalog No. 3606

Lantern Battery

Large steel BUST DEFLECTOR

Easily assembled with a screwdriver.

Battery not included

Catalog No. 3606
“Here’s the fabulous mini line!”

Each kit can be built in one of two different styles

**FIREFLASH**
**MISSILE**
Semi-scale missile styled after a classic British rocket, it really flies great. This 10" beast features parachute, gorgeous "decal", and 3 plastic nose cones.

**RECOMMENDED MOTORS**
1/4A-2M A-4M
1/4A-3M 8-4M
1/4A-4M 8-4M

**SPECIFICATIONS**
Length 10.5"
Diameter 1.25"
Net Weight 1.2 oz.

**$250**
Catalog No. KM-6

**STAR TROOPER**
**CONTEST BIRD**
A 6" baby, stripped down for ultimate altitude! Hollow plastic nose cone allows for re-ejection streamer recovery. Includes "stick-on" decals and balsa fins, plus parts for alternate longer version.

**RECOMMENDED MOTORS**
1/4A-2M A-4M
1/4A-3M 8-4M
1/4A-4M 8-4M

**SPECIFICATIONS**
Length 6.5"
Diameter 0.54"
Net Weight 0.6 oz.

**$25**
Catalog No. KM-3

**NOVA**
**SPORT ROCKET**
12 inches of high performance with long clean lines. Includes balsa fins, decals, balsa nose cone, and parts to build for re-ejection streamer, or nose ejection parachute.

**RECOMMENDED MOTORS**
1/4A-2M A-4M
1/4A-3M 8-4M
1/4A-4M 8-4M

**SPECIFICATIONS**
Length 17.4"
Diameter 0.75"
Net Weight 0.8 oz.

**$195**
Catalog No. KM-4

**MINI-DACTYL**
**CONTEST BOOST GLIDER**
Truly sophisticated 15" long "system" for extremely long boost-glider duration! Includes streamer-recovery pod, 2 color decals, balsa nose cone and balsa for building TWO gliders.

**RECOMMENDED MOTORS**
1/4A-2M A-4M
1/4A-3M 8-4M

**SPECIFICATIONS**
Length 15.5"
Diameter 0.54"
Net Weight 0.7 oz.

**$295**
Catalog No. KM-6

**TWO-BITZ**
**FOR ONLY 6 BITS**
Pre-cut fibre sheets to make TWO 5" long feather-weight recovery rockets! Bit #1 is all pre-colored with a plastic nose cone! Bit #2 is left un-colored, so you can customize.

**RECOMMENDED MOTORS**
1/4A-2M A-4M
1/4A-3M 8-4M

**SPECIFICATIONS**
Length 6.5"
Diameter 0.54"
Net Weight 0.5 oz.

**$75**
Catalog No. KM-1

**SATELLITE 62SL**
**GYRO ROCKET**
Spins like a gyro copter on the way down, after engine ejection. This 8" long rocket features black & chrome "stick-ons", molded nose cone, and four long wood "antenna" fins.

**RECOMMENDED MOTORS**
1/4A-2M A-4M
1/4A-3M 8-4M
1/4A-4M 8-4M

**SPECIFICATIONS**
Length 9.0"
Diameter 0.54"
Net Weight 0.2 oz.

**$100**
Catalog No. KM-2

---

Check out the size comparison above to see why Mini's are like standard engines... and why they are not!

Mini's have a nozzle (1) and casing pretty much like a standard engine, but scaled down in size for flying smaller-diameter rockets. Great for the altitude contests! The propellant (2) in a Mini-Motor packs as much power as a standard engine in the same class. Examples, Mini 1/4A = standard 1/4A. The delay (3), ejection (4), and cap (5) work just like in a standard engine.

Our Mini-Motors originally were 2 3/4" long... this length allowed for up to "B" power. We had used special extra-strong paper to make mini size casings capable of withstandering "B" power. Now, the worldwide paper shortage, and other considerations have forced us to discontinue the "B" mini series, and to shorten the engines length.

Every cloud has a silver lining, though. Read on, true believer... Limiting the Mini's to "A" power (and below) and decreasing their length from 2 3/4" down to 1 1/2" has an advantage for you: Our new, standard length Mini-Motors may now also be used to fly other mini rockets on the market!

We now supply a few 3" long spacing tubes with each box of Mini-Motors. Simply insert the spacer into your engine mount, ahead of the Mini-Motor. Just leave out the spacer tube, if you use the previous longer version.

And speaking of mini rocket kits, here's what the newsletter of the Stardard H.O. model rocket club of Honolulu, Hawaii has to say referring to a recent contest: "The boost gliders were dominated by the new Centauri Mini Dactyl. In "Gnat BG" (1/4A power) the strategy was clear, beat the Mini-Dactyl! All was to no avail, as all three places went to Mini Dactyl... winning time was 1 minute, 27 seconds...!"

Mini Motors cost a little less than standards, per engine. You can use Mini's with any launcher and standard "Sure-Shot-Dot" igniters (included).
“Try some hi-flying fun! Here’s 10 Screen Rocket Models.

**Screaming Eagle**
- Ideal Beginner Rocket
- Assemble & fly in 20 min.
- All parts are pre-colored
- Colorful Metallic Decals
- Only requires glue
- Cat. No. KF-3
- $250

**Excalibur**
- Research Rocket detailing
- Big - over 2 feet tall
- Die-cut Fibre Fins
- Chrome Trim & Decals
- Quick-change Engine Lock
- Cat. No. KA-12
- $250

**X-24 Bug**
- Unique Formed/Paper design
- Body and Wings detailed with three pre-painted colors
- Tech Report explains principle of Semi-Glide Recovery
- Cat. No. KC-4
- $150

**Long Tom**
- A Giant! Three feet tall!
- Sure "Passport" Staging action
- Baffle/Chute Ejection System
- Pre-cut Balsa Fins, Decals
- Cat. No. KC-4
- $450

**Little Hercules**
- Gentle tumble recovery
- Includes special "Fin" weights to create tumbling effect.
- Super easy to build
- Sturdy pre-cut Balsa Fins
- Cat. No. KA-1
- $100

**SST Shuttle**
- Double-Action Recovery
- Glider separates in flight
- Almost two feet long
- Huge Decal Sheet
- "SST Concepts" Report
- Cat. No. KC-17
- $8.95

**Javelin**
- Popular Beginner Kit
- Pre-cut Balsa Fins
- Colorful Custom Decals
- Flights to 1900 feet
- Quick-change Engine Lock
- Cat. No. KC-31
- $195

**Nomad**
- Navy Missile styling
- ½ feet tall
- Pre-cut Fibre Fins & Vanes
- Large, super detailed Decals
- Long Nose Cone & Chrome Trim
- Cat. No. KB-5
- $350
"16 of our most popular birds!"

**ASTRO-1**
- Ideal Beginners Rocket
- Big Roll Pattern Decal
- Climbs nearly ½ mile
- Quick-change Engine Lock
- Excellent Starting Kit
- Big pre-cut Balsa Fins

**SKYLAB**
- Space Station styling
- Over two feet long
- Embossed Chrome Solar Panels
- Detailed Plastic Nozzles, Cones
- Large Colorful Decal Sheet

**TAURUS**
- Planetary Space Cruiser
- Large, massive looks
- Exotic Decal Markings
- Molded Nose Cones, Balsa Fins
- Custom painting tips

**LASER-X**
- Futuristic looks
- Almost 2 feet tall
- Pre-cut Balsa Fins and Vanes
- Large 3 color Decal Sheet
- Realistic lift-offs

**MOONRAKER**
- Dual Configuration
- Sleek "Rakish" design
- Versatile Fibre Fins
- Simple to construct
- Both sections power separate and Gyro-Flutter to earth

**SPACE SHUTTLE**
- Two Glide Return Crafts
- Years ahead of its time
- Shuttle uses Power Deployment
- Large pre-cut Balsa Wings
- Molded Nose Cones and Cockpits
- Huge 3 color Decals

**MICRON**
- Easy-to-Build
- Flamproof Crepe Streamer
- Molded Nose Cone
- Unbelievable altitudes
- A tough, durable model
- Chute Wadding optional

**STILETTO**
- Two Stager
- High flights up to 2400 feet
- Dual Streamers for safe recovery
- "Passport" Staging reliability
- Custom Decals included
- Pre-cut Balsa Fins and Vanes
Try the ultimate in realistic flying rockets...

"SUPER-SCALE"

THE SATURN SERIES...

These two Super Scale models are the world's most highly detailed and well engineered Saturn rocket kits. A few other rocket kits come close, but nothing can match these for authenticity and completeness!

EACH KIT INCLUDES:

- Detailed Body Panels
- Molded Apollo Capsule
- Accurate Apollo Tower
- Removable Display Nozzles
- All Parts Pre-Formed
- 4-Color Scale Decals
- Historical Brochure
- Clustering Tech Report
- Instruction Book

AMERICA'S MOON ROCKET

SATURN V
3-ENGINE SHOW STOPPER!*?

Here is the famous Cernuti Saturn V, accepted throughout the world as the flying replica of the rocket that takes Man to the Moon! Scaled from official NASA blueprints, this is the perfect kit for rocketeers experienced in scale and cluster powered models.

- Over 36 Feet Tall
- Triple Chute Recovery
- Clear Stabilizing Fins

Catalog No. KS-12 $24.95

MOONSHOT FORERUNNER

SATURN 1B
DUAL ENGINE POWER!*?

Richly detailed model of #SA-205, the first rocket to launch a manned Apollo mission. The Saturn 1-B is not a beginner's kit, but extreme care was taken in designing this kit so the average builder could turn out a museum quality model.

- Over 2 Feet Tall
- Dual Chute Recovery

Catalog No. KS-10 $13.95

APOLLO TOWER TESTER

LITTLE JOE II
TRIPLE ENGINE POWER!*?

Here is a monster-sized super scale model of the true Little Joe test vehicle to be flown, NASA FSCM 012. The incredibly rich variety of exotic materials and parts in this handsome kit makes it much easier to build than it looks!

- Two Feet Long...and Fat!
- Dual Chute Recovery
- Chrome-Covered Body
- Removable Display Nozzles
- Historical Brochure

Catalog No. KS-8 $17.95

ALAN SHEPARD'S

MERCURY REDSTONE
SINGLE ENGINE POWER!

Unquestionably the finest, most accurately detailed flying model of the famous rocket that first carried an American into space. Includes an extremely detailed Mercury capsule with all parts pre-formed.

- Nearly 2 Feet Long
- Dual Chute Recovery
- Huge 3 Color Decal
- Historical Booklet

Catalog No. KS-1 $5.95

WEATHER RESEARCHER

NIKE SMOKE
SINGLE ENGINE POWER!

This kit is a 1/10th scale model of the solid propellant rocket engine used by NASA to measure wind velocities at altitudes up to 75,000 feet.

- 2 Feet Long...a Climber
- Large Single-Chute
- Huge Molded Cone, Plus Decals
- Easy Assembly, Plus Data Sheet

Catalog No. KS-15 $3.95
SPECIAL CHRISTMAS SALE!

Limited Edition LIA-70 LAUNCHER

Just like our famous LIA-77 Tripped Launch Stand ... but with a different deflector than shown in its instructions. Includes sturdy wooden legs, 36" rod, and all hardware. Supply your own controller ... see below.

Only $2.95

Catalog No.

LIA-70

“LECTRA-LINE” 1” Launch Controller

Almost as versatile as our EFC-2 and the “Power-Control”. Includes chuck light and sturdy pre-assembled circuit. Great for LIA-70 Launcher! Use with any 6 V or 12 V lantern battery.

Reg. Price

$3.95

Now Only

ROSES ARE RED

VIOLETS ARE BLUE IF WE CAN WRITE POETRY, THEN SO CAN YOU!

Gary Ruiz of Los Gatos, California, sent us the poem below, just for the fun of it ... and so we present it here, for your erudite identification ... or whatever!

I shot my rocket into space.

It fell to earth sometime.

I was probably not in the know -

China claims I hit Kwajalon.

Cho-Lo-Lit is hopping mad;

it seems my aim was very bad.

All my rocket experts

Now belongs to the Chinese!

CARTOON CONTEST

CONTEST PRIZE WORTHY $4.50

Want to see your cartoon published? Just draw what you think is a funny, cartoonish model rocket and send it to me, ye Oldie Editor, "Rocket Times".

Each issue, we will pick the one most suitable for publication, just like we did below! This issue we chose one sent in by:

PETER GRAVES of Palos Verdes Estates, California. No, he's probably not the Peter Graves from "Mission Impossible!" But his underwater project looks like an impossible mission!

NEWS FLASHES

TILTER BONUS ... The Power-Pad Tiltling accessory is now included with every Power-Pad! Formerly an optional item, this launch rod angle ajuster now comes with Big Shot and Eagle Power outfits, as well as the basic Power-Pad.

R. & D. CONTEST ... Things are really jumping in the Special design contest announced last issue! We'll judge entries after the deadline of October 31, 1974. See the winner's names next issue!

READY FOR XMAS? ... Do you have a friend who would like model rocket stuff for Christmas? You say you don't know what to get? Well, grab your pen. True Believer... Centuri comes to the rescue again! You can give a present right from the comfort of your own home, with a Centuri Gift Certificate! Just fill out the special part of the order blank, show how much you want to give, send us the money, and we'll send your friend a handsome Gift Certificate and catalog in your name!

KEEP 'EM FLYING. ... In case you haven't heard, the Centuri Aerospace Team is the "only way to fly"! You can join the oldest existing rocket club offered by any manufacturer. ... For only 50¢ you get all this:

1. Membership card for wallet
2. Certificate for wall
3. I.D. Sticker
4. Rocket Design Manual
5. Iron-On Shirt Insignia
6. Giant "Team" decal sheet
7. PLUS, you get on our mailing list to receive future issues of "Rocket Times"

NEW TRIPPO ... Have you seen our new "Power-Tower" launch stand? ... (see page 2) This versatile product replaces our old LIA-77 and LIA-100 wooden tripods ... and costs less.
